

Resource-o-Rama! Tips and Tools

facilitated by Lisa Van Gemert

Let's Connect!

This list shares ideas for tech resources that educators can use to develop gifted students' talents and interests. On the table below, the columns to the right identify the benefit explanations of the resource so that educators can find resources that fit their need(s). These are not exhaustive; many of the resources have applications far beyond what is defined here, and all can be used for differentiation of instruction. The benefit explanations include:

- Creation: resources for creating products
- Creativity: sites that assist students in expanding or exploring creativity
- Exploration: these resources help students explore possible interests/expand their exposure to new potential interests or perspectives
- Engagement: resources for engaging students
- Organization: these resources help students/educators organize projects, ideas, web links
- SEN: resources that help in meeting social/emotional needs
- Sharing: these resources facilitate students' or educators' sharing products, ideas, or web links
